SOLID WASTE PRESENTATION

SCOTT McWILLIAMS
MANAGER, ENFORCEMENT BRANCH, SOLID WASTE DIVISION
WHAT IS SOLID WASTE?

- Any garbage, or refuse, sludge from a wastewater treatment plant, water supply treatment plant, or air pollution control facility and other discarded material, including solid, liquid, semi-solid, or contained gaseous material resulting from industrial, commercial, mining, and agricultural operations, and from community activities, but does not include solid or dissolved materials in domestic sewage, or solid or dissolved material in irrigation return flows or industrial discharges that are point sources subject to permit under 33 U.S.C. 1342, or source, special nuclear, or by-product material as defined by the Atomic Energy Act of 1954, as amended (68 Stat. 923).
CATEGORIES OF SOLID WASTE

- HOUSEHOLD
- INDUSTRIAL
- COMMERCIAL
- CONSTRUCTION & DEMOLITION
CLASS 4
CLASS 4 WASTE

- Nonhazardous, bulky, inert, nonputrescible solid wastes that do not degrade, or degrade very slowly… Class 4 wastes include construction and demolition wastes, appliances, furniture, stumps, limbs and other bulky wastes that are not normally collected with other household, commercial or industrial waste.
CLASS 3
CLASS 3 WASTE

• Nonhazardous commercial, industrial and special solid wastes that are permitted by the Department to be disposed of in a Class 3 landfill.
CLASS 1
CLASS 1 WASTE

• Nonhazardous household, commercial, and industrial solid waste... and small quantities of conditionally exempt hazardous wastes.
INDUSTRIAL SOLID WASTE

Industrial Solid Waste means solid waste generated as a result of manufacturing or industrial processes that is not a hazardous waste regulated under Subtitle C of RCRA or as defined by Regulation Number 23, Sections 260.10 and 261.3, of the Pollution Control and Ecology Commission. Such waste may include, but is not limited to, waste resulting from the following manufacturing or industrial processes: Electric power generation; fertilizer/agricultural chemicals; food and related products/by-products; inorganic chemicals; iron and steel manufacturing; leather and leather products; nonferrous metals manufacturing/foundries; organic chemicals; plastics and resins manufacturing; pulp and paper industry; rubber and miscellaneous plastic products; stone, glass, clay, and concrete products; textile manufacturing; transportation equipment; and water treatment. This term does not include mining waste or oil and gas waste.
SPECIAL WASTE

• Any materials that require special handling precautions and disposal procedures by the landfill owner or operator beyond the normal activities associated with landfill operations.
Those soils which have been physically, chemically or biologically altered by gasoline, diesel, kerosene, heating oil, jet fuel or any other petroleum product.
ADEQ REGULATORY DETERMINATION ON DRILL CUTTINGS

• Because of the odor problem associated with drill cuttings and the potential for runoff to contaminate waters of the state, ADEQ has determined that drill cuttings are not appropriate for use as daily cover.
LIQUID WASTE PROHIBITION

• Mixing and Bulking – Landfills shall not accept liquid waste for treatment unless the landfill has an approved mixing or bulking area separate from the waste disposal area, and is equipped to solidify, test and certify that liquid wastes treated in the mixing or bulking area meet the requirements of this section for landfiling.

Search Form

Please make your selection(s), then click the "Search" button.
All Facility Class Codes Checked and all other fields left blank or "No Restrictions" returns the complete list.
AFIN, Permit Number, Facility Name and Facility City are matched if the record contains what you enter.
All other fields are matched if the record equals what you enter.
